"Powerful yet simple..."

Freight Forwarding Management for AIR

Manage your AIR Freight with ease...

Vixsoft's software offers a fully-integrated environment capable of satisfying the complex needs of air freight operators who are required to deliver a fast and reliable service in today's tough global economy.

From point of quotation through to delivery, Vixsoft provides the most comprehensive financial and management information, equipping the operator with real-time intelligence and competitive advantage. Vixsoft's system offers complete management of emails and documents to dramatically improve productivity. Its ability to automate many routine tasks combined with a wide range of functions increase accuracy, efficiency and ultimately **PROFIT!**

All your documents in one place...

Our Freight Forwarding Management System incorporates unique features not found elsewhere, including a document storage facility allowing paperwork relating to specific jobs to be electronically filed and recovered easily with minimum time and effort.

Vixsoft's optional plugins offer additional functionality enabling documents to be attached to projects from within Microsoft Outlook 2007+. Scanned documents can also be attached, eg signed PODs, even when received in bulk.

The bottom line...

Vixsoft's system has been designed to help operators increase accuracy and efficiency which result in proven cost savings. As well as increasing the operator's bottom line, their customers benefit from enhanced customer service and care.

Freight Forwarding Management for AIR

+ Quick and easy-to-use - Incorporates a simple user interface with logical navigation and flow of processes.

+ Variety of printed documents - Includes MAWB's, HAWB's, Labels, IATA barcode labels, collection/delivery notes, in-house and user-defined documents, invoices, manifests, and many more.

+ Fast-build facilities - Allow for effective management of consolidations including built-in calculating of cubic weight from dimensions.

+ Optional track and trace - online portal that you and your clients can view with live updates.

+ Job costing - Monitor quoted and actual job costing to improve cash flow.

+ Reporting - A range of operational management reports

+ Convert quotations to consignments

+ Customs clearance - Clear goods directly from the Job via all popluar communites including CCS-UK, ASM, CNS etc.

+ Powerful integrated functionality - Single data entries populate multiple forms. Create templates for fast efficient entry of replicated jobs.
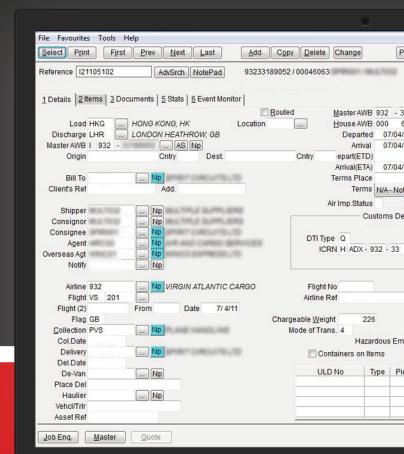

Company wide visibility...

Corporate data for freight groups is held within the central Vixsoft databank. Updates are synchronised instantaneously and system-wide, facilitating immediate visibility to users throughout the group regardless of their location. Data need only be entered once, increasing efficiency and accuracy of projects through dramatic reduction of labour and risk.
